

CALL FOR PAPERS

COVID-19 has had a major impact on our professional and personal lives over the last two years. As a result EABCT's 2020 Congress in Athens becoming a virtual event and the 2021 Congress in Belfast was delivered as our first hybrid congress with delegates attending in person and online.

We have all had to reconsider how we deliver therapy, train practitioners and run our congresses. We know that Covid19 will continue to have repercussions on the psychological, physical health and well-being of many people well into 2022. We also know that CBT has played an important role in helping people cope with these difficult years and we can be proud of what cognitive and behavioural therapies have already achieved.

The EABCT Congress is returning to Barcelona for the first time since the successful World Congress in 2007 and the theme of the 2022 EABCT congress programme will be "Rethinking CBT".

We are planning to run a 3-day Congress in Barcelona next September and welcome EABCT members and non-members to participate in person. We look forward to being able to share knowledge and experiences and once again build the close relationships across Europe and beyond that our congresses have always achieved. In addition, we will be making part of the programme available to delegates online to increase access to the Congress for delegates who may be unable to attend in person.

Given the experience of the last two years we want to have a focus on how we continue to adapt to the new ways that we have had to live and practice our therapies. We will also welcome submissions relevant to all our congress streams and look forward to seeing you in 2022.

Congress Streams

Adult Mental Health 1:

Trauma, Anxiety, Depression, OCD, BDD and Habit Disorders

Adult Mental Health 2:

Psychosis, Eating Disorders, Addictions, and
Personality Disorders
